Bulletin No. 04-2017

To: NISS Member Companies

Re: Data Quality Reports – Premium Thresholds

NISS sends Data Quality reports for selected lines of business to companies as part of its effort to provide members with helpful reports on their Call submissions. Data Quality reports contain detailed results of NISS edit checks, and depending on the Call, may also contain distribution total listings (Prooflists) and quota determination reports (Plan B).

Data Quality reports will be sent to member companies for the following 2017 Calls: Automobile (A), North Carolina Quarterly Automobile (AQR), Assigned Risk Quarterly Automobile (ARP), Commercial Lines (CLSP), and Homeowners (HO). The Data Quality reports will only be sent if the submission exceeds the following written premium thresholds:

	Written Premium Threshold	
A	\$500,000	<b>Written Premium Threshold applies to:</b> - each company separately - each quarter separately, for ARP & AQR - each state separately - each module separately, for CLSP
AQR	\$125,000	
ARP	\$15,000	
CLSP	\$500,000	
HO	\$250,000	
<b>Company/state totals are compared to threshold:</b> - if <b>any</b> state is above, data quality reports are sent for <b>entire</b> company - if <b>all</b> states are below, data quality reports are <b>not</b> sent		

NISS Data Quality reports may still be received when a submission falls below the written premium threshold – simply get in touch with us and request a copy. Please feel free to contact me if you have any questions.

Very truly yours,

Becky Konkle  
Statistical Manager
