To: NISS Member Companies

Re: New NISS Training Videos – Edit Software Related

We are pleased to announce there are 2 new *NISS Training Videos* now available on our website for member companies to view at your convenience. The first of these training modules gives a demonstration of the common components of the NISS Edit Software packages and how to navigate the various features. The Edit Software packages are available to member companies by NISS, free of charge and can be used to evaluate your data files before submitting to NISS (see [Bulletin 06-2014](#)).

The second video explains in detail the various reports available and how they can be used to review and analyze your data file.

Member companies can view these online training sessions from the “Training Videos” page under the “Training/Education” menu item on the NISS website ([www.niss-stat.org](http://www.niss-stat.org)). There is no charge for viewing this module.

Company users who have utilized the NISS Edit Software packages have found them immensely useful in correcting coding and reasonableness inaccuracies before sending their data to NISS, thus avoiding a need to delve further into their data or, perhaps, submit a refile.

We believe short, informative, online videos to be a powerful addition to our existing tools for NISS member companies, and we look forward to further developing our library of online training modules. Please let us know if you have ideas for topics to be covered; NISS welcomes your suggestions!

And as always, feel free to contact us if you have any questions.

Very truly yours,
